

Testbeam '98

Undergraduate Research Project

This opportunity to participate in a high energy physics experiment in an international collaboration has been a very enjoyable part of our undergraduate career and has added depth to our physics education. We would like to thank all the members of the EEPP group here at the University of Arizona for making this possible. Testbeam '98 was conducted at CERN, Geneva, Switzerland in collaboration with Canada (Carleton U., Ottawa & U. of Toronto) and Russia (ITEP, Moscow)

Student researchers:

T. Embry, C. Goldman, J. Seely

Project Supervisor:

P. Loch
